

# BeeBIM

---

## Visualization

### Test case

The following test case aspires to explain our workflow regarding the nature of required input, thorough knowledge of 3DsMax and the Corona render engine, precise process algorithms, and examples of final products, so our clients could get a better understanding of our systematic approach and attention to detail.

BeeBIM  
+31 (0)85 301 17 71  
guy@beebim.nl  
Seinstraat 22  
1223 DA Hilversum

**The benefits of hiring BeeBIM:**

- Thorough knowledge in 3DsMax and Corona render engine
- An efficient end-to-end process
- Short lead time
- White label service using client's or our template
- On demand capacity

**Objective**

**Content:**

Inputs from clients .....	2
Our process algorithm.....	3
Output: V1 sketch phase .....	4
Output: V2 preview phase .....	5
Output: V3 preview phase .....	6
Output: Final render.....	7

### Input data we expect from our clients:

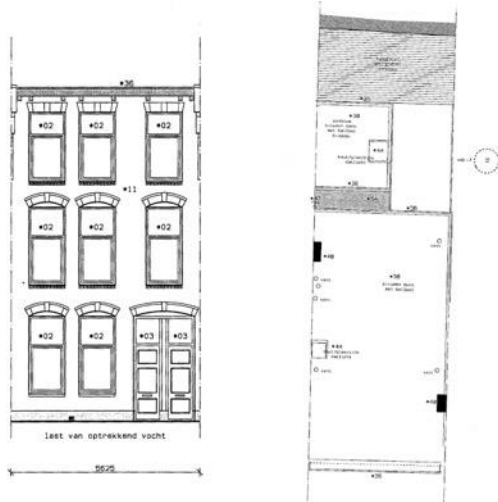

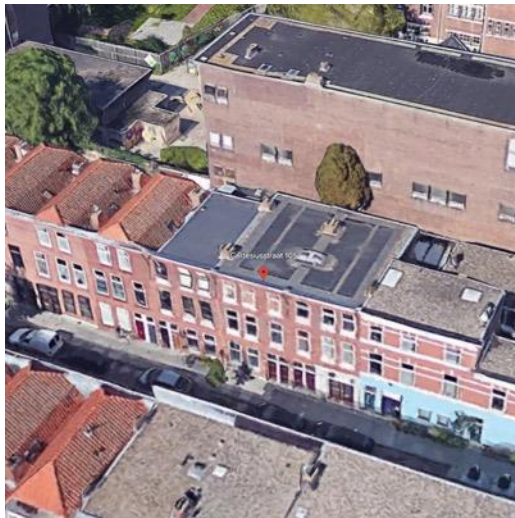

- Floor plans
- Elevations, Sections, Mood boards,
- Models, Sketches

### Input data that represent our basis for visualization:

Address - Cartesiusstraat

Examples of provided inputs: google earth, google street, elevations, floor plans, Archicad model.

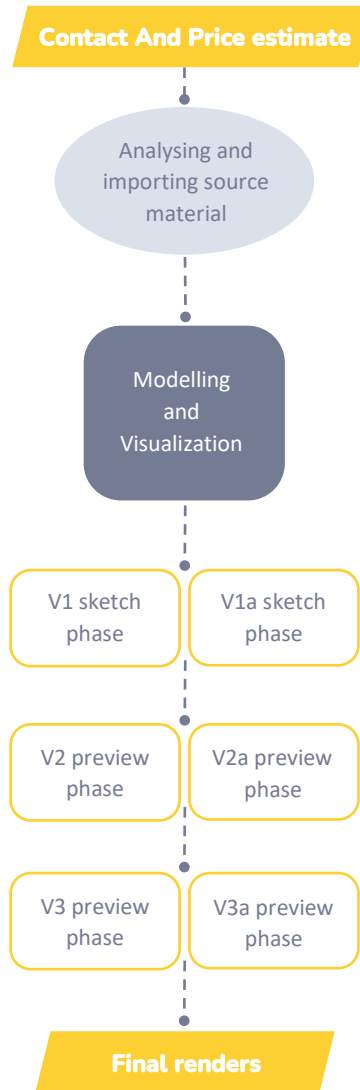

## Input

### Our process algorithm:

- Importing and analysing source material
- Modelling, setting up materials, lighting, cameras.
- Rendering and postproduction.
- Providing renders and 360° walk through cameras.

## Process

### Output documents for our clients:

#### V1 sketch phase

override materials

no postproduction

2k resolution

#### V1a sketch phase

client feedback

Example of visualization sketch phase:

Output

### Output documents for our clients:

#### V2 preview phase

materials

no postproduction

2.5k resolution

#### V2a preview phase

client feedback

## Output

Example of visualization V2 preview phase:

### Output documents for our clients:

#### V3 preview phase

materials

postproduction

2.5k resolution

#### V3a preview phase

client feedback

Example of visualization V2 preview phase:

Output

**Output documents for our clients:**

**Final render phase**

- materials
- postproduction
- 4k resolution

Example of visualization final render phase:
